Flag: Follow up

Hi Carol,
Steve asked me to give you an update on the Regional Groundwater Investigation. The BPOW is the designation for all the outpost wells. Currently, Massapequa outpost well BPOW 6-5 is being installed and BPOW 6-6 is scheduled for installation in early February. Based on the current schedule, installation of South Farmingdale outpost well BPOW 7-1 will begin in early March. The last of the VPBs for SFWP are being drilled now and should be completed in February.
I have attached the drilling schedule which is updated monthly based on changing field conditions. I have also included a map which is currently being updated just as a reference. I will send an updated map to Henry and Steve by the end of the month along with the monthly update.
Let me know if you have any questions
R/
Lora

Lora,

Can you update Carol on the MW/ OPW status?

Thanks,

Steve

Thanks Steve. The attachment indicates that for MWD, well BPOW 6-3 and 6-4 were completed in December, BPOW 6-5 would be completed in Jan '15, and BPOW-6-6 would be done in February '15. I assume that these are the actual monitoring wells for MWD, or are they looking for more info as per our discussion?

Thanks.
